

LEARNING **M**ANAGEMENT **S**YSTEMS BASED ON **G**ITHUB

A COLLABORATIVE CODING ONLINE SERVICE

REUVEN YAGEL

Software Engineering Department

Azrieli - The Jerusalem College of Engineering

robi@jce.ac.il

AGENDA

- Project Management Services and Github
- Application for teaching and software engineering courses
- Pros and cons
- Examples
- Discussion
- Resources

ABOUT GITHUB

- Project management: code, docs, issues
- Based on the git DVCS
- Free for open source projects, but also private and enterprise services
-  Branches and pull request interface, other services, e.g. static site hosting, integrations

GITHUB.COM/ABOUT

- 12M+ users (developers?), 31M+ repositories
- Not only for software development
 - wired.com/2013/09/github-for-anything
 - infoworld.com/article/.../github-for-the-rest-of-us
- Popular as SE research target:

נשים הן מקודדות טובות יותר – אבל רק כשהמגדר שלהן נסתר

חוקרים מצאו שקוד של תוכנה שנכתב על-ידי נשים ונשלח עם בקשת משיכה ב-GitHub מתקבל בשיעור גבוה יותר מאשר קוד שנכתב על-ידי גברים, אבל רק אם הן לא גילו את מגדרן

הדפסה

14 בפברואר 2016, 12:19

מאת גלי פיאלקוב

קבוצה של סטודנטים למדעי המחשב החליטה לנסות ללמוד כיצד הטיה מגדרית מתנהלת בקהילות פיתוח תוכנה.

החוקרים הניחו כי מקודדים עלולים להפגין יחס המבוסס על דעות קדומות כאשר ידעו כי קוד נכתב על-ידי

TEACHING & SOFTWARE ENGINEERING COURSES

- Course material hosting
- Assignments: instructions, examples & starter code
- Submission & review
 - e.g., through pull requests
- Students' project management

BENEFITS

- Feature rich, especially for learn by doing, team work
 - Others: SourceForge, BitBucket, GitLab, Atlassian, ...
- Culture: openness, transparency, collaboration / social
 - -> Creativity, Design thinking, Problem Solving
- Reuse and share course content (other instructors, students)
- Industry relevant tool
 - Academic licenses
 - building professional portfolio

LIMITATIONS

- Vendor lock
- Entry barriers, Usability issues with git
- Missing features and services:
 - class management, forums, ...
 - Advanced PM tools
 - -> enough for course level, 3rd party completion
- Privacy / Copyright issues
- Validity of measured metrics

*Chris Wanstrath (github co-founder):
"people came to github inspite of git"*

EXAMPLES

- Course wiki
- Course materials
- Assignments / Starter code
- Review & Feedback

יחידות (Modules) נושאים עיקריים הנלמדים בקורס זה

עמוד זה מציג את היחידות (מודולים) או הנושאים העיקריים המרכיבים את הקורס.

לחצ'י על המשבצת המשויכת ליחידה בכדי לראות את תוכנה.

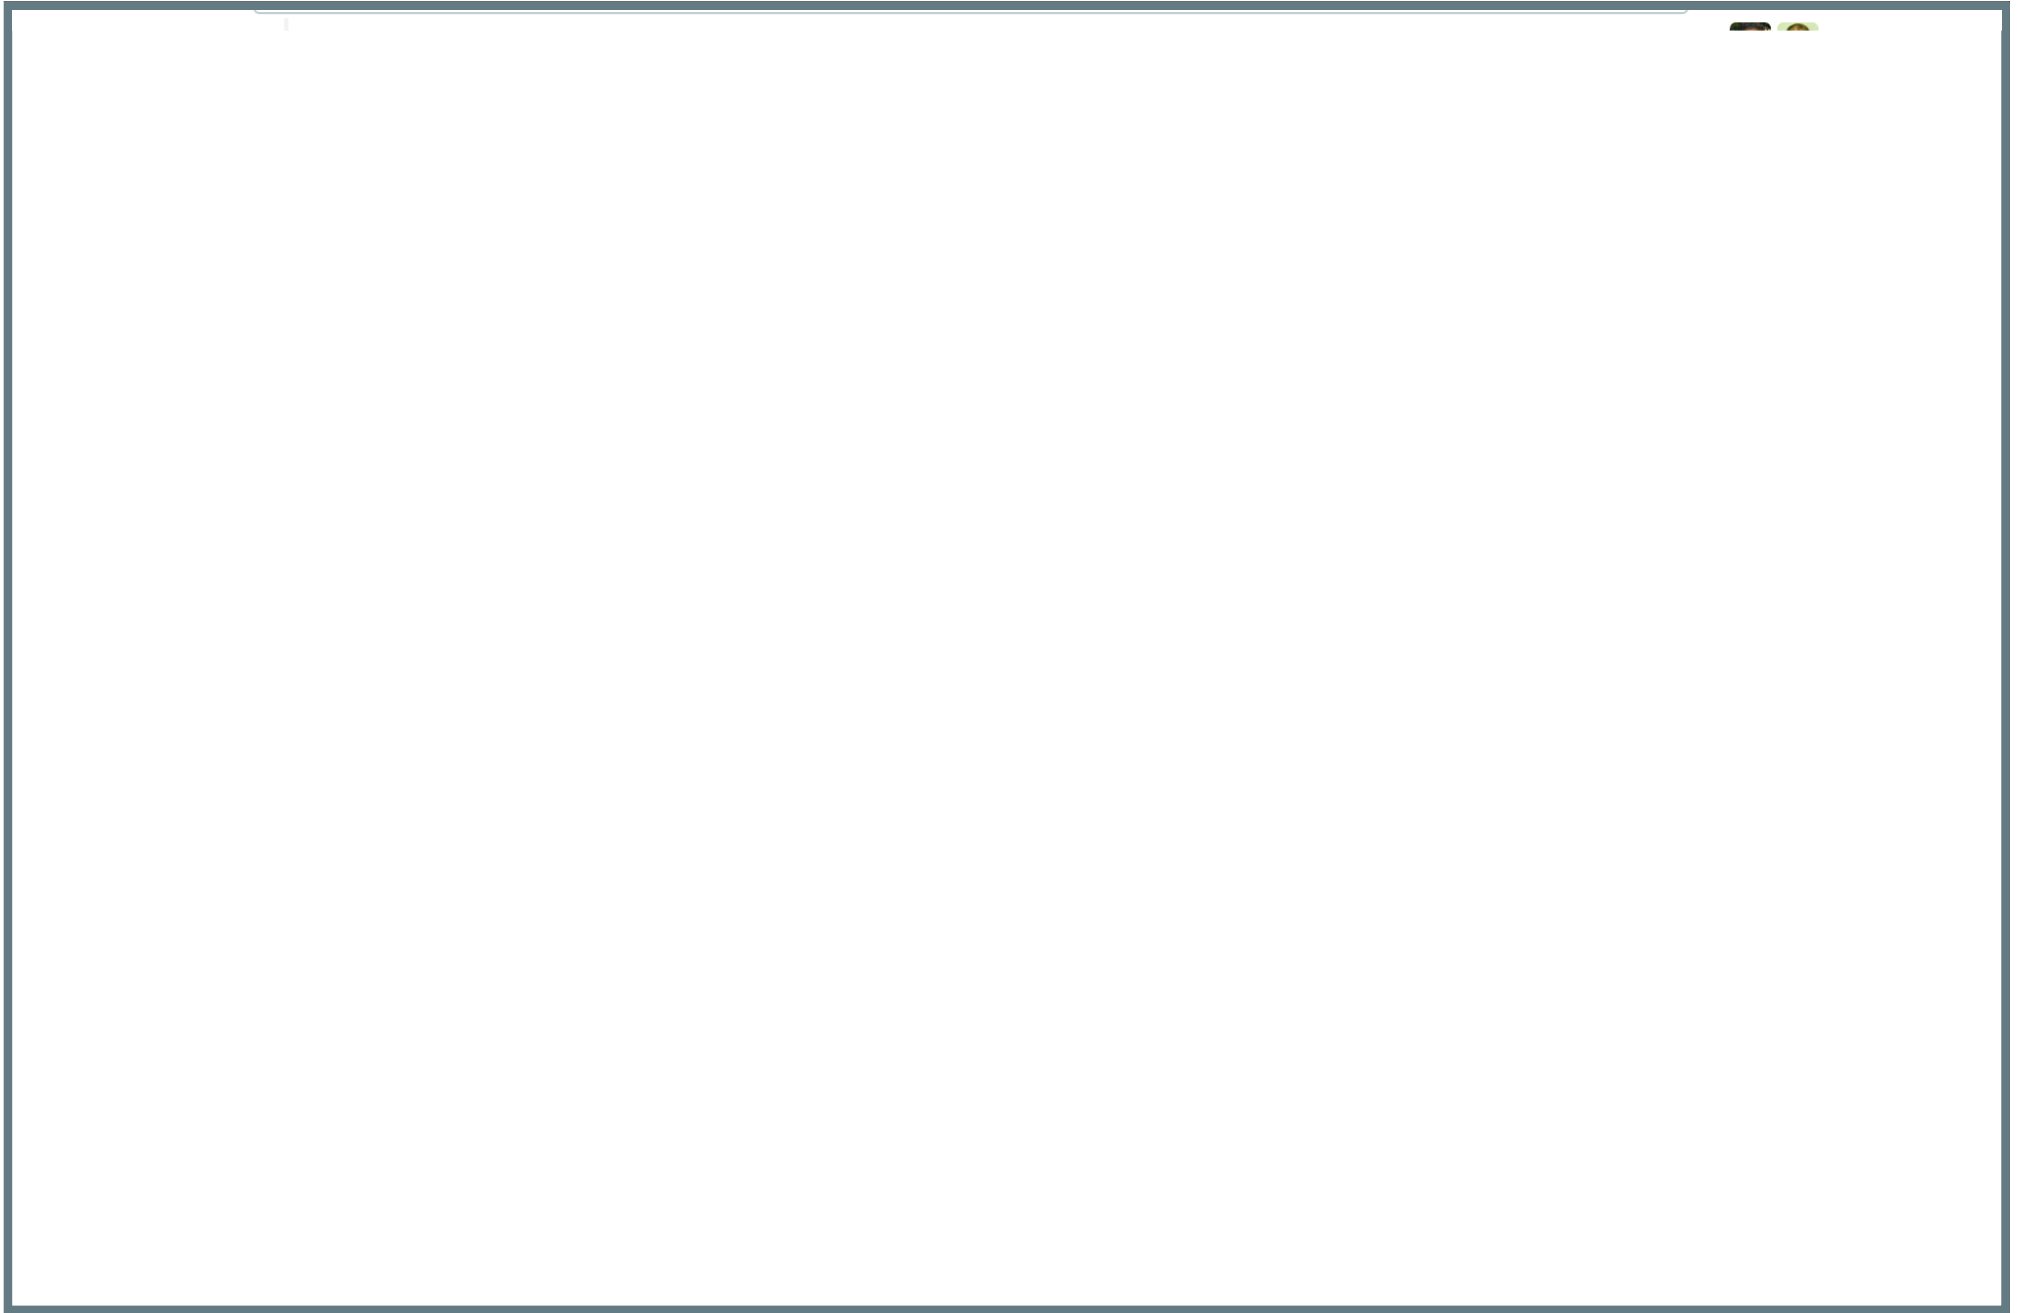

roby Initial failing test d0b546c on May 25, 2015 1 contributor

TDD Kata - FindAPerson

A repository for HW4 of the JCE [Software Engineering Course](#)

Intro

In this homework we are exercising [Test Driven Development](#). In this software development method code is written through

CONCLUSIONS & DISCUSSION

- Free and accessible LMS for everyone
- Potential for relevant and meaningful learning
 - Especially for software engineering
- Issue of plagiarism in an open knowledge era
- Currently, not friendly enough
 - Still emerging, e.g., classroom.github.com

THANK YOU!
